

Education

Bachelor of Engineering in **Computer Science and Engineering**
Lords Institute of Engineering and Technology [GPA : 8.5]
Osmania University, Expected : **07/2026**
Relevant Coursework: **Cybersecurity Fundamentals, Networking, Cryptography, Operating Systems.**

Technical Skills

- **Cybersecurity & Risk Management:** Vulnerability Assessment, Penetration Testing, Threat Modeling, Risk Assessment, Ethical Hacking, Incident Response, Governance, Security Awareness, Regulatory Compliance (ISO 27001, NIST CSF, GDPR, SOC 2)
- **Security Tools & Frameworks:** Wireshark, Nmap, Burp Suite, Kali Linux, Metasploit, Nessus, OpenVAS, OSINT Tools (Shodan, VirusTotal, PhishTank), OWASP Top 10
- **Programming & Scripting:** Python (Automation, Analysis, Flask), Bash, HTML, CSS, JavaScript, SQL
- **Cloud & Platforms:** AWS (IAM, S3, VPC), Azure Security Center, GSuite, Streamlit, GitHub Actions
- **Soft Skills & Consulting:** Client Communication, Problem Solving, Commercial Awareness, Team Collaboration, Project Management, Adaptability, Workshop Facilitation

Experience

Software Developer Intern

AiTesta • Aug 2025 – Present

- Developing a **full-stack enterprise dashboard** for software testing platforms (similar to JMeter Workbench) using **React, Flask, and PostgreSQL**.
- Built secure **authentication and role-based access control**, ensuring compliance with industry security best practices.
- Collaborated with a cross-functional team to deliver a **scalable, cloud-ready platform** for performance and stress testing.

Projects

AI Malware Detection & Analysis System - [Project Repo](#)

- Built an AI-powered malware detection system that analyzes Windows **.exe** files using static PE features and machine learning (Random Forest, XGBoost, ANN).
- Trained on 600,000+ samples from the EMBER dataset, achieving over 96% accuracy in classifying malware vs. benign files.
- Developed CLI, desktop GUI, and Streamlit web app interfaces for real-time executable scanning and model comparison.

Security Risk Assessment Dashboard - [Project Repo](#)

- Built a full-stack web application to assess and visualize organizational cybersecurity risk based on NIST CSF and ISO 27001 frameworks.
- Implemented assessment input forms for system details, mapped controls and threats, and generated dynamic radar/heat map visualizations.
